Ordinarily it is sufficient to pile the muck closely and carry the tamping on out to the very mouth of the tunnel. i i Fig. 88. --Diagram of. Wiring for Tunnel Blast TAMPING Ordinarily the word tamping is used to cover both the act of closing a bore hole and the earthy material used. A better use is to designate the act or work as Tamping and the material as Stemming. . Stemming, except for gopher holes and tunnels should be free from stone and grit. For large holes where the weight of the stemming gives the confinement, dry free running sand is good. For other work a moist, easily packed sand, clay or loam is best. Dry light material such as the Bug Dust from drills, augers or cutting machines should never be used. Good tamping is one of...
