The amount of fertilizer to apply will vary with the natural fertility of the soil, the previous treatment, and the crops to be grown. A pound for 50 square feet should bring desired results on most soils. No amount of commercial fertilizer, however, will make up for a deficiency of humus; in fact, large applications of commercial fertilizers are justified only on soils well supplied with humus. When manure is not used the humus is usually supplied by turning under a soil-improving crop. Rye is the crop most generally used as it may be planted late in the season after the vegetables have been harvested, CROPS AND VARIETIES FOR THE HOME GARDEN Generally too little attention is given to the needs and preferences of the family, when the garden is planned. Crops that are not relished should never be grown unless...
