RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 146 pages. Original publisher: Cleveland, Ohio : National Aeronautics and Space Administration, Lewis Research Center ; Springfield, Va. : National Technical Information Service, distributor, 1990 OCLC Number: (OCoLC)62218079 Excerpt: . . . SUMMARY ATIAP activities during the past year were high-gasifier turbine rotor, the ceramic metal power lighted by test-bed engine design and development turbine static structure, and the ceramic power tur-activities; ceramic component design; materials bine rotors. A ceramitized standard diffusion and component characterization; ceramic compo-flame AGT-5 combustor design was completed and nent process development and fabrication; compo-analyzed for both start-up and maximum power op-nent rig testing; and test-bed engine fabrication and erating conditions. Following some minor modifica-testing. Although substantial technical challenges tions (addition of swirl vanes, etc), the calculated remain, all areas exhibited progress. probability of survival (POS) exceeded goal re-quirements and the resulting configuration pos-Test-bed engine design and development activity sessed significant flexibility to aerodynamically included engine mechanical design, power turbine tune the combustor flow field. Design concepts flow-path design and mechanical lavout. and en-were prepared. FFM

Reviews

This book is definitely worth acquiring. I have go through and so i am certain that i will likely to read through again again in the future. Its been printed in an exceptionally basic way in fact it is only after i finished reading this publication in which actually altered me, change the way in my opinion.

-- **Andres Bashirian**

Comprehensive guide for publication fanatics. This really is for all who statte there had not been a well worth reading through. I discovered this ebook from my dad and i encouraged this book to find out.
