New Computer Culture Foundation (Sixth Edition) (computer class) tells the story: With the computer technology. the rapid the development of computer applications have penetrated into all fields of human society. the computer has gradually become a learning. working and living an indispensable tool. Therefore. the computer skills is an integral part of the basic skills of college students today. and how to really improve one of the students' computer skills are also vocational colleges has been to explore the problem. Ministry of Education. teaching [2006] 16 document pointed out that the establishment of curriculum standards for the outstanding professional ability. to reform teaching methods and means of financial 'to teach. learn to do' as one. and strengthen the ability of students . Therefore. according to the actual requirements of the modern office applications. starting from the students and professional capacity to change the past emphasis on knowledge of architecture. the practice of teaching basic knowledge of computer applications software classification function for the sequence. bold use of project-oriented . examples of teaching method of organization of teaching. breaking the shackles of the knowledge architecture. the main line of production work. interspersed taught computer application knowledge in the production practice. A New Computer Culture Foundation (Sixth Edition) (computer class) has the following characteristics: 1. For the work selected instance. focus on training students' computer skills book consists of 11 projects. each project to teach the production of a work. but also a practical example of computer applications. These examples are for students in school and future work of selected representative examples of most of the...
