# Architecture Glasses to Discover Codes

By Behnam Ghasemzadeh

Createspace, United States, 2015. Paperback. Book Condition: New. 235 x 190 mm. Language: English . Brand New Book ***** Print on Demand *****.Audiences of this book are students of architecture, architects and those who are interested in architecture and its design process. It has a simple look at architectural design aspects during training and after that, process of entering professional working market-which is missing in syllabus of some architecture faculties. Using the term of Consider, I intended to share my little, but efficient, experience of education and work with other students and fans of architecture. Characteristics of this field, architecture, give it a special view of all other majors. I call it Architecture glasses to discover codes. The main purpose is quick reference and brief review of concerns regarding discovering codes that an architect has experienced or might experience during architectural training and professional working. Architectural design is a goal-oriented, conscious and organized process that is led and organized by the designer for reaching mostly clear aims and purposes. Architectural designers face a group of problems, about which they have had diverse and similar experiences during training or professional working atmosphere. However, these problems are considered unique and different by...
